ExampleCo: External AI Tools Policy
FICTIONAL DEMONSTRATION ONLY - NOT ACTUAL COMPANY POLICY
Policy ID: POL-PDF-001 | Edition: 2026.1 | Effective: 2026-10-01

1. Approved tools and confidential information
Use only company-approved AI tools for company work. Do not paste contracts, employee information, customer information, or confidential business material into an unapproved external AI tool. Draft and unsigned agreements are still company documents and are covered by this restriction.

2. Requesting a review
To request review of an AI tool, submit a legal intake request with the tool/provider name, business purpose, categories of data, intended users, and available provider terms, retention settings, and training-use settings. Legal coordinates Privacy and Security review. Do not upload restricted information while review is pending.

3. Historical approval and unanswered details
Approval for a different tool, purpose, or data category does not approve your proposed use. The assistant cannot verify whether a particular tool is currently approved or grant an exception. Ask Legal Operations to check the approved-tool register. No approval date or turnaround is guaranteed.

4. Demonstration scope
This PDF is a fabricated sample for testing extraction and retrieval. The demonstration assistant accepts fictional data only. These instructions do not represent any real organization’s policies or legal requirements.
